

Errata, Table 1 in *Household Food Security in the United States, 1995-1998: Advance Report*

The 1998 estimates for “Adult Members” and “Child Members” were inadvertently based on data as screened in the 1998 questionnaire rather than on the 1995--1998 common screen. The reported estimates are valid for 1998, but they are not comparable to those of earlier years presented in this table and in tables 2A--2C. The correct, common-screen estimates are:

	1998 b/ (000) (%)	
Adult Members (total) and by Household Food Security Level:	197,423	
Food Secure	178,631	90.5
Food Insecure:	18,792	9.5
Without Hunger	12,657	6.4
With Hunger	6,135	3.1
Child Members (total and by Household Food Security Level:	71,463	
Food Secure	59,090	82.7
Food Insecure:	12,373	17.3
Without Hunger	9,114	12.8
With Hunger	3,259	4.6

The 1998 household statistics in Table 1 are correct as reported.

Errata, Table 2D in *Household Food Security in the United States, 1995-1998: Advance Report*

The 1998 estimates for “Adults in households” and “Children in households” were inadvertently based on data as screened in the 1998 questionnaire rather than on the 1995--1998 common screen. The reported estimates are valid for 1998, but they are not comparable to those of earlier years as reported in tables 2A--2C nor to the household estimates in table 2D. The comparable, common-screen estimates are:

			Food Insecure:						
		Food Secure		All		Without Hunger		With Hunger	
Category	Total	(000)	(%)	(000)	(%)	(000)	(%)	(000)	(%)
Adults in households	197,423	178,631	90.5	18,792	9.5	12,657	6.4	6,135	3.1
Children in households	71,463	59,090	82.7	12,373	17.3	9,114	12.8	3,259	4.6

The household statistics in Table 2D are correct as reported.
